Goldhill: reversing range normalization does not remove the red streak
Fixed historical coefficients and kernels; shared DN-equivalent display; + marks the same boundary pixel

Raw | Topographic only | BRDF only | Topographic + BRDF

Existing normalized Northing (m)

5 m

Native 0.1 m pixels

Easting (m), NAD83 / UTM 13N

All rows: identical RGB 650 / 560 / 475 nm; common valid mask and raw-reference 2–98% RGB limits.
Historical BRDF model is invalid; hypothetical row does not establish physical calibration. No per-panel stretch.
